

TEJASHWINI MALGE

AI Engineer | Agentic AI | LLMs | Multimodal AI

Bidar, Karnataka | trmalge@gmail.com | +91 76194 33994

tejashwiniporfolio.vercel.app | linkedin.com/in/tejashwinimalge | github.com/Tejashwini-Malge

SUMMARY

Final-year Computer Science student and AI Engineer building systems across Agentic AI, multi-agent systems, LLMs, RAG, and multimodal AI. Hands-on experience in applied AI research and full-stack AI product development using Python, PyTorch, FastAPI, Next.js, and PostgreSQL.

TECHNICAL SKILLS

Languages: Python, SQL

AI / ML: LLMs, Agentic AI, RAG, PyTorch, Transformers

Multimodal AI: Computer Vision, Vision-Language Models, Multimodal Learning

AI Systems: Multi-Agent Orchestration, Tool Calling, Agentic Workflows

Frameworks: FastAPI, Next.js, React, Prisma ORM

Data & Tools: PostgreSQL, Neon PostgreSQL, Docker, Git, GitHub

EXPERIENCE

National Institute of Technology Karnataka (NITK)

May 2026 – Present

Research Intern — Medical AI / Deep Learning

Surathkal, Karnataka

- Surveyed research and thesis literature on deep-learning and multimodal methods to identify limitations and frame the medical-imaging problem for the internship.
- Completed structured training in RNNs and Transformer architectures, and identified candidate attention-based and vision-language approaches for the assigned imaging task.

Vitainspire — T-Hub

Jun 2026 – Present

AI Social Impact Fellow (Part-Time) — AI Systems / Full-Stack Development

Hyderabad, Telangana

- Built an administrative dashboard using Next.js, TypeScript, Prisma ORM, and Neon PostgreSQL supporting NGO verification, project approval, proof-of-work review, compliance, and fraud investigation.
- Integrated **4 specialized AI agents** for compliance validation, fraud detection, document verification, and campaign review within the NGO administration workflow.
- Implemented human-approval workflows requiring administrators to document a reason when overriding an AI recommendation.

PROJECTS

AIRA — AI Communication Platform

Oct 2025 – Present

Individual Project

- Built an LLM-powered interview-prep platform with adaptive questioning and personalized feedback across six communication dimensions, targeting confidence, communication, and interview performance.
- Validated with **70+ users** students, educators, trainers, and professionals and iterated on the experience from their feedback.

BlogAgent — Multi-Agent Content Pipeline

Mar 2026 – May 2026

Individual Project

- Engineered a **3-agent** research, writing, and editing pipeline that generates complete blog drafts in 6–7 minutes.
- Implemented configurable loop-based autonomous refinement for multi-pass content improvement.
- Piloted with **20+ AI engineers, founders, and creators**, tightening content quality and usability from their reviews.

EDUCATION

Srinivas University Institute of Engineering and Technology (SUIET), Mangalore

Oct 2023 – Mar 2027

B.Tech in Computer Science & Engineering

CGPA: 9.50 / 10

Guru Nanak Independent PU College, Bidar

2020 – 2022

Pre-University Course (PCMB)

LEADERSHIP & COMMUNITY

- Guest Trainer:** Delivered AI and communication workshops to **750+ students** across colleges and institutions.
- Community Builder:** Built and grew a **3,000+ member LinkedIn community** focused on AI, networking, and career development.
- Hackathons:** Competed in a 24-hour AI hackathon and the State-Level SAP HackFest, building complete solutions under tight time limits.
- Speaker's Club Coordinator:** Organized public-speaking sessions and mentored students in communication.
